**Summary of reasons
for classification:**

The DVD *Body Melt* is classified as:

Objectionable except if the availability of the publication is restricted to persons who have attained the age of 18 years.

This feature has previously been examined and classified as a video recording by the Classification Office. In a decision registered on 18 April 1995 *Body Melt* was classified as objectionable except if the availability of the publication is restricted to persons who have attained the age of 18 years, and given the descriptive note 'Contains violence, offensive language and sex scenes'.

The DVD has additional components, in the form of trailers, behind the scenes footage and a collection of still images. The additional components do not provide grounds to alter the classification given to the original publication.
